

## How to Construct TOS (Table of Specifications) for Testing Language?

Rabu, 01 November 2023, 13:13 WIB, Oleh: Nuri Ati Ningsih, Rengganis Siwi Amumpuni

---

This book is designed to be used as a reference for teachers with skills and knowledge about constructing a table of specification (TOS) as a blueprint for a test. TOS is a tool to help the teacher decide to create test construction and improve the validity of the teacher-made test for evaluation. It is also helpful for teachers to determine the kinds of examinations they need to administer based on the course materials. It involves the content material to be covered and the relative emphasis to be placed based on the materials and instructional objectives stated in the curriculum. The contents of this book were taken from various relevant and up-to-date data source which covers some chapter including testing, evaluating, and assessment in language learning, bloom taxonomy, testing by using HOTS (higher order thinking skills) and constructing test specification.
